- Address: Sidi Bisher., El Montazah Department, Alexandria
- Date of birth:12/10/1994

OBJECTIVE:

Infection control specialist seeking to improve my skills and knowledge in the field of infection to minimize risk of infection and prevent outbreaks by applying all infection control standards and environmental cleaning and sanitation

EDUCATION:

1. American board of infection control (CBIC certified) april2022
2. Diploma of food safety from Alexandria University 2019-2020
3. Bachelor's degree of veterinary medicine Alexandria universityclass 2012-2017, Grade (very good)

EXPERIENCE:

Senior infection control specialist in Andalusia hospital from april2022 till now

Job description:

- Reviews patient charts and microbiology and virology reports for evidence of HAIs and applies National Health and Safety Network (NHSN) definitions to identify and report HAIs through the use of an electronic surveillance system. Documents appropriate information in patient electronic record.
- Conducts ongoing infection control surveillance, prevention, and control program activities within a healthcare setting to identify early and/or suspected outbreaks of infections and communicable diseases, and to control and reduce the risk of exposure and avoid transmission by using epidemiologic principles.
- Collects, tabulates, analyzes, and interprets infection data and records, and prepares and reviews reports; utilizes appropriate reporting programs; accurately reports "reportable diseases" to the appropriate public health departments and responds to public health department inquiries, as needed.
- Leads and mentors others in apparent cause analysis to identify modifiable risk factors and other infection prevention opportunities.
- Follows-up on patients, personnel, and visitors who have communicable disease or blood exposure within the healthcare system and serves as a resource for the Employee Health Department.
